To: Our Customers

Subject: OSHA - Material Safety Data Sheets (MSDS)

The federal Hazard Communication Standard, or Right to Know Law requires employers to provide knowledge and awareness of hazardous materials to their employees. The information is to be provided for all materials that will be used in the workplace through the use of Material Safety Data Sheets (MSDS). However, there are certain materials excluded from the requirement. Certain of those materials, defined as items having an end use function that does not release or otherwise result in exposure to a hazardous chemical under normal conditions of use, are categorized as articles.

Our wire and cable products meet the definition of an article, and as such are **exempt** from the OSHA standard entitled Hazard Communication (29CFR1910.1200) and it's MSDS requirement.

If you should require further information please do not hesitate to contact us.

Sincerely,

Kris-Tech Wire Co.
